

Cardiovascular Antibodies

Elabscience[®]

Focus On Lab Research Service For Life Science

About Elabscience

Elabscience specializes in immunodiagnostic technology for the life science community. We have complete R&D and manufacture platform and have good quality control for every kit. We endeavor to reduce lot to lot variation to keep your experiment results more consistent and precise. Through unremitting efforts and development, our customers have spread in more than 100 countries and districts all over the world.

Elabscience's major products are Proteins, Antibodies, ELISA kits, CLIA Kits, labeling kits and related reagents. Elabscience also provides custom services for our customers including protein expression and purification service, antibody customized service, ELISA customized service, cell biology service, molecular biology service, and whole research project solutions.

Product introduction

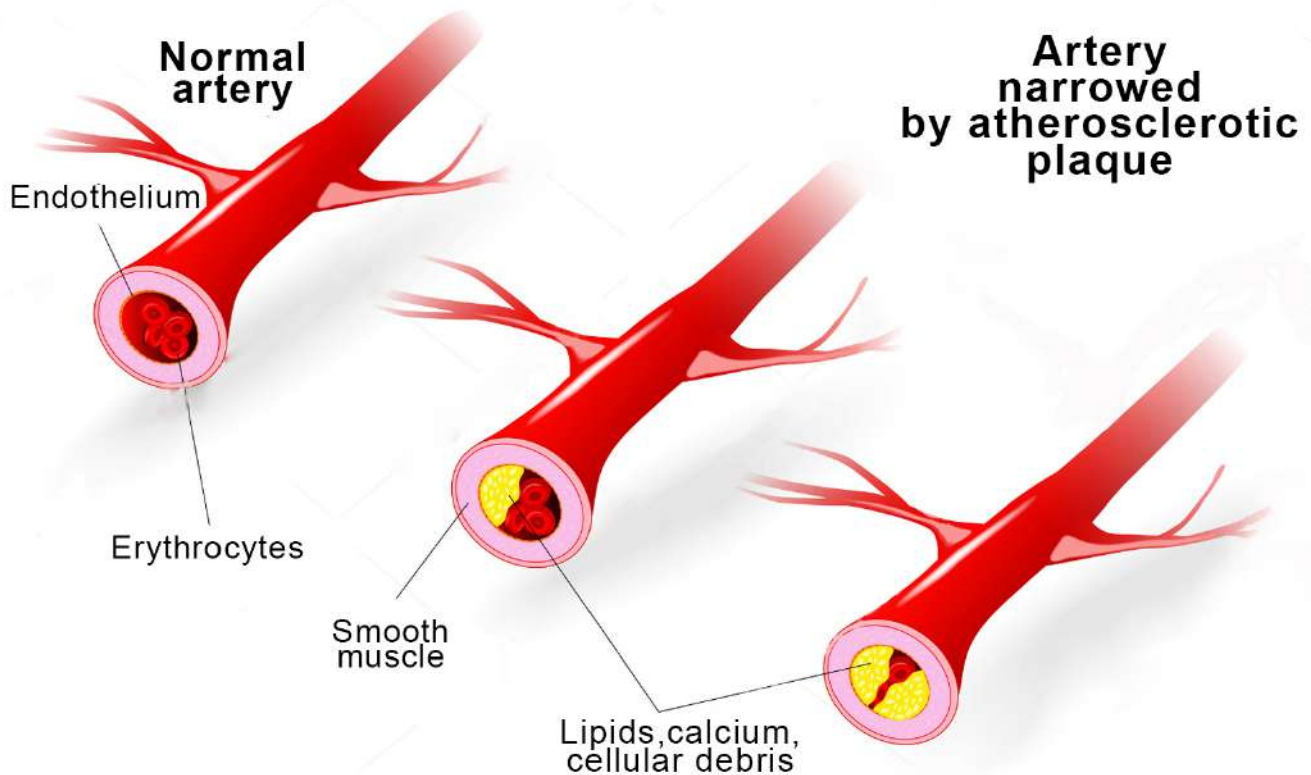

The cardiovascular system

Cardiovascular system is an organ system that permits blood to circulate and transport nutrients (such as amino acids and electrolytes), oxygen, carbon dioxide, hormones, and blood cells to and from the cells in the body to provide nourishment and help in fighting diseases, stabilize temperature and pH, and maintain homeostasis. The study of the blood flow is called hemodynamics. The study of the properties of the blood flow is called hemorheology. Much research aims to understand the cardiovascular system during disease development with angiogenesis, vasculature, atherosclerosis and heart research.

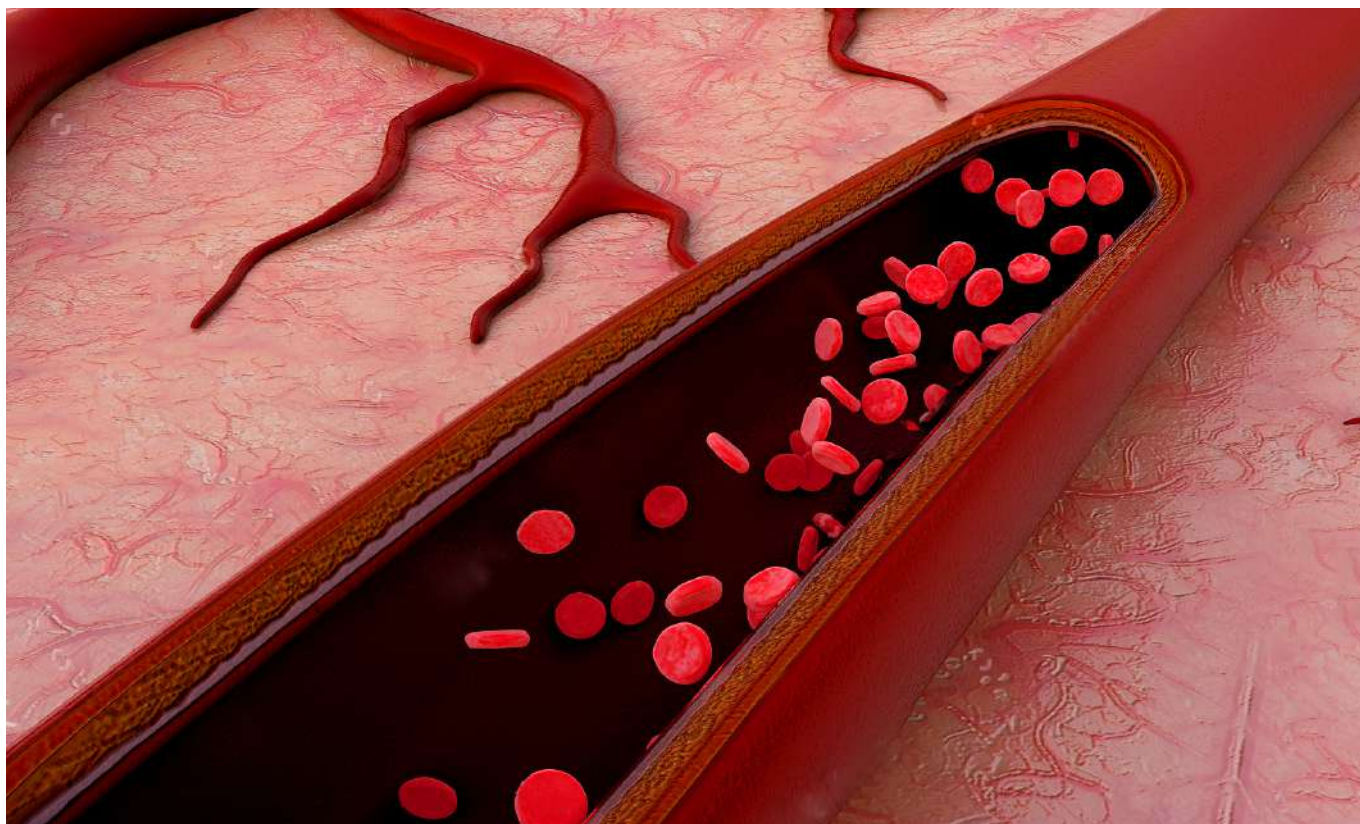

Atherosclerosis

Product details

Angiogenesis

Cat. No.	Product Name	Swissprot	Reactivity	Application
EPM12352	LAMR1 RPSA Monoclonal Antibody	P08865	H M	ELISA WB IHC
ESAP14485	RPSA Polyclonal Antibody	P08865	H M R	ELISA WB IHC
ENT0112	ADAMTS-1 Polyclonal Antibody	Q9UH18	H	WB ELISA
ESAP16247	ADAMTS2 Polyclonal Antibody	O95450	H	ELISA IHC
EAP0618	CTSK Polyclonal Antibody	P43235	H M R	WB
ESAP11295	CYR61 Polyclonal Antibody	O00622	H M R	ELISA WB IHC
ESAP11500	ITGA2B Polyclonal Antibody	P08514	H M	ELISA WB IHC
ESAP16712	IFT74 Polyclonal Antibody	Q96LB3	H	ELISA IHC
ENT1025	COL4A2 Polyclonal Antibody	P08572	H M	WB IHC IF ELISA
EAP0851	PTK2 Polyclonal Antibody	Q05397	H M R	WB IHC
ENP0108	FAK (Phospho-Y861) Polyclonal Antibody	Q05397	H M R Mk	WB ELISA

A microscopic view of a blood vessel. The vessel lumen is filled with numerous red blood cells, which appear as bright red, biconcave discs. A prominent, yellowish, elongated structure, possibly a fibrin strand or a platelet aggregate, is visible within the vessel, partially occluding the flow. The vessel wall is visible as a thin, pinkish-red layer.
